DROP AS BOTH A WORD AND A PDF

Meeting Notes, Project: Data Driven Concept Project

Meeting Number:	**Meeting Date:**	**Start Time:**	**End Time:**
1	2/9/2026	4:30pm	6:00pm

Attendee Name (Indicate note taker with *)	**Timeliness (on time, late, left early, missing)**
Ben Lyons	On time
Sean Balbale*	On time
Izzy Pringle	On time
Zoe Kuehne	On time

Purpose: Analyze data, draft idea, assign slides to make and present

Agenda:

- Review the data and observe a common pattern (poor sleep, scheduling issues, forgetting to eat, procrastination)
- Brainstorm solutions to observed patterns of issues.
- Outline Slides
- Split up slides

Major Accomplishments:

- Agreed upon data point to focus on (repeated submissions of poor sleeping habits)
- Planned out a homework related program that will penalize late night submissions and reward homework completed in a timely manner at an appropriate time of day

Next Steps:

- Continue Presentation preparation

Meeting Notes:

Meeting begins at 4:30pm. Ben, Sean, Izzy, Zo in attendance.

Reviewed data reporting from the provided spreadsheets. Noticed common theme of sleep, public speaking, productivity, and teamwork issues. Agreed to present and prototype a way to improve sleep.

Planned a program that rewards timely completion of assignments by giving extra credit if turned in by a certain time (ex. 9:30pm) and lightly penalizes late night submissions (ex. 1am) in order to encourage proactivity and sleep and discourage procrastination.

Group began working on outline for presentation

As a change in presentation of idea after further examination of the data, we all agreed that it would be best to frame our presentation as a solution to time management/procrastination rather than sleep due to their far more frequent appearance in the data. Also, as a group we decided that it wouldn't make sense for students to be penalized for late night submissions.

Ben takes slides 1,2. Sean takes 6,7. Zoe takes 3,4 izzy takes 4,5. Planned on getting raw slides (data, visuals, not polished) done by EOD 2/9/2026. Meeting 2/10/2026 at 6 pm in MECC 136 to polish slides and run.

Meeting Notes, Project: Data Driven Concept Project

Meeting Number:	Meeting Date:	Start Time:	End Time:
2	2/10/26	6:00pm	7:00pm

Attendee Name (Indicate note taker with *)	Timeliness (on time, late, left early, missing)
Ben Lyons*	On time
Sean Balbale	On time
Izzy Pringle	On time
Zoe Kuehne	On time

Purpose: Finish up slides and rehearse presentation

Agenda:

- Polish up slides with formatting and visual fixes
- Rehearse presentation to ensure it can be completed in a timely manner

Major Accomplishments:

- Finished slide show
- Rehearsed presentation

Next Steps:

- Continue practicing slide presentation
- Turn in work

Meeting Notes:

Begin at 6:00pm in the MECC 136. Met up and recapped what was accomplished outside of meeting (new slides, etc.). Discussed any changes or concerns we had about the slideshow, like the ordering.

Fix formatting and visuals of slideshows. Selected images to cut down on wordiness and replace longer paragraphs. Found some images to accompany certain pieces of text.

Rehearsed presentation and fell short of desired time.

Adjusted presentation by adding another slide and altering the contents of some slides and the speech that goes with said slides.

Rehearsed more to reach the desired length for the presentation.

Meeting ended at 7:00 pm.

Potential Outline - Data Driven Concept Presentation.docx

Meeting Number:	**Meeting Date:**	**Start Time:**	**End Time:**
3	2/18/26	4:00 pm	5:00pm

Attendee Name (Indicate note taker with *)	**Timeliness (on time, late, left early, missing)**
Ben Lyons	On time
Sean Balbale	On time
Izzy Pringle*	On time
Zoe Kuehne	On time

Purpose: Come up with improvements based on feedback from version 1 of the slideshow.

Agenda:

- Brainstorm updates
- Make our slides more engaging
- Rehearse presentation to ensure it can be completed in a timely manner

Major Accomplishments:

Next Steps:

- Create our new slides
- Make our slides more cohesive and cleaner
- Rehearse our presentation

Meeting Notes:

- Met on 4:00 pm on 2/18 and started by discussing our concept
- Changed our concept from an incentivized early submission syllabus clause to a Moodle Extension that would allow professors to choose incentives for submitting early and that way submission time could be flexible.
  - Small grade boost
  - Additional time on future assignments
  - Professor customizable option with a point system for dropping lowest quiz grade
- Discussed what to include and what to remove from our slide deck. What we need to add:
  - Line graph
  - Professor Interface Mockup
  - Budget and timeline
- Including: adding line graphs, removing text, picking an entire new slide deck
- Picked an entire new slide deck (https://moodle.org/ for theme ideas)
- Implementation:
- Time: 1 month
- Cost: $2,500-5,000
- Who: coding contractors – specific company???
- We are meeting with Trinity professors to implement our extension, and we are offering our support so that they can host sessions to get the professors familiar with the extension
- Advantage for professors they can grade things sooner since people are incentivized to submit sooner.

Our group met at 4:00 pm on 2/18 to discuss the necessary changes to our project. We started by hashing out the details of our original concept and how we could update it to make it better. As a group, we decided that instead of incentivizing early submission syllabus clause to a Moodle Extension that would allow professors to choose incentives for students that submit early. We decided that our Moodle Extension would be called EarlyBird and generated a logo that aligned with the Moodle theme.

EarlyBird structure options:

- Option 1: Small grade boost
- Option 2: Additional time on future assignments
- Option 3: Professor customizable option with a point system for dropping lowest quiz grade

Next, we discussed what slides to include and remove from our slide deck. We made an outline and decided what each slide should be about. As a group, we decided that we wanted to add a line graph, a Moodle Extension mockup, budget/timeline, and more. Then we decided to choose an entirely new slide deck because we wanted a slide theme that was more engaging with our audience.
Finally, before ending the meeting at 5:00 pm, we decided to divide the slides up and agreed to complete our own individual slides before the weekend was over.

Slide outline:

1. Title slide
2. Who we are
3. Why our issue matters
4. Backed by data – 50%
5. Line Graph showing consistency of issue
6. Our Solution Structure with the three different options
7. Option 1—Small grade boost
8. Option 2—Additional time on future assignments
9. Option 3—Customizable point system (ex. poor quiz grade dropped)
10. Interface mockup
11. Implementation slide
12. Brain activation slide
13. University of Illinois – maybe find a different one or condense it?
14. Final Drive in slide with the call to action – really illustrate how it'll help everyone, professors get stuff back earlier
15. End slide—with our catchphrase

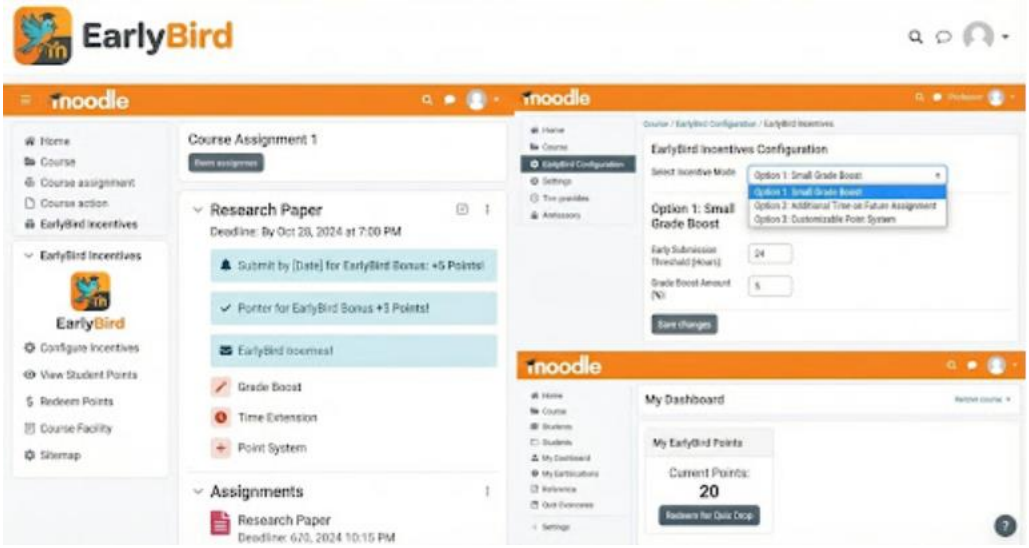
Here is a visual walkthrough of how the **EarlyBird** Moodle plugin would work in practice, showing the experience for both the professor and the student.

1. The Professor Configures the Plugin

First, a professor goes to their course settings. With the plugin installed, they will see a new "EarlyBird Configuration" section. Here, they can choose which of the three incentive models to use for their course. In this example, the professor has selected **"Option 1: Small Grade Boost"** and configured it to give a 5% grade boost for assignments submitted at least 24 hours early.



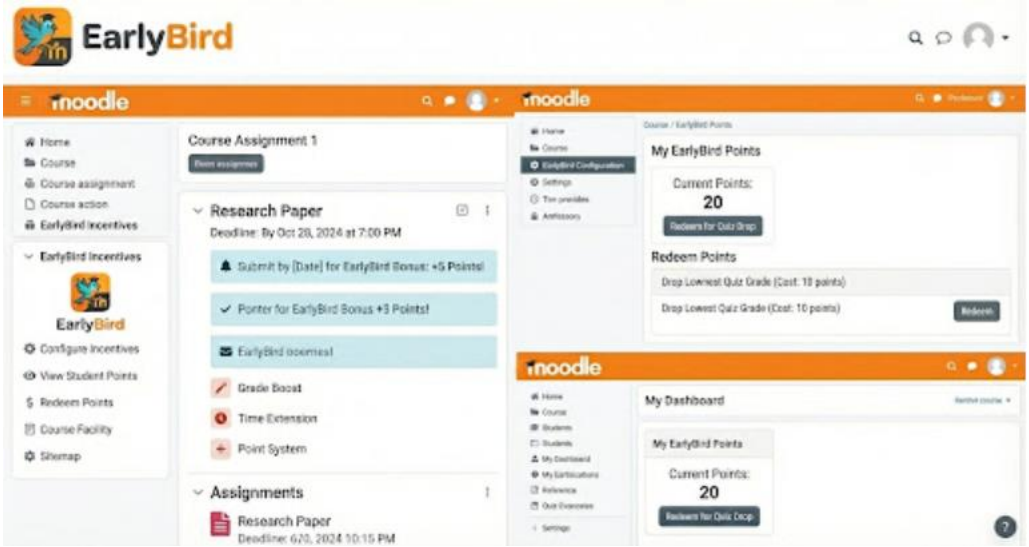
2. The Student Sees the Incentive Applied

After a student submits an assignment that meets the professor's configured criteria (e.g., submitting 24 hours early), the plugin automatically applies the grade boost. The student's assignment submission page will clearly indicate this. In the image below, the student sees a green banner confirming an **"EarlyBird Grade Boost Applied: +5%"** and their grade is adjusted accordingly.

3. The Student Point System & Redemption

If the professor chooses **"Option 3: Customizable Point System"**, students will have a dedicated "My EarlyBird Points" page. Here, they can see their accumulated points and redeem them for rewards. As shown in the image below, a student has earned 20 points and can redeem 10 of

them to **"Drop Lowest Quiz Grade"**. This empowers the student to choose when and how to use their earned incentives.



Meeting Number:	Meeting Date:	Start Time:	End Time:
4	2/23/2026	4:30	5:30

Attendee Name (Indicate note taker with *)	Timeliness (on time, late, left early, missing)
Ben Lyons*	On time
Zoe Kuehne	On time
Izzy Pringle	On time
Sean Balbale	On time

Purpose:

- Finalize presentation

Agenda:

- Check in with slide show and put finishing touches on presentation
- Decide who will present which slides
- Practice presenting

Major Accomplishments:

- Finished slideshow
- Distributed and rehearsed

Next Steps:

- Continue to practice presenting slides
- Make any necessary last minute adjustments to slideshow

Meeting Notes:

Meeting starts at 4:30pm on zoom, start by overviewing what was accomplished over the weekend. Who worked on what. Then we decided on whether some slides are relevant, like the slide giving an overview of the 3 options of the early bird extension prior to the in-depth exploration of each option.

Next the slides were distributed in a way where everyone would present in a chunk of slides according to is most knowledgeable with certain topics in the presentation.

Practiced presenting the slideshow to end the meeting. Adjustments made between rehearsals in content of slides and in distribution of slides. Some of the mockups were adjusted and speaker notes were clarified.

Meeting ends at 5:30pm
